EXPERIENCE

Coding Dojo, Arlington VA — Teaching Assistant for Amazon Cohort

January 2021 - PRESENT

- Helping assist Amazon employees with their assignments and career paths towards getting a job in the technical industry
- Supporting instructors with attendance, homework, exam grading, and lectures
- Recording video tutorials walking through the process of building a full stack web application
- Motivating students in the channels everyday through zoom or the chat and making sure no questions get left unanswered

Kirby & Pals | kirbyandpals.com — Freelance Software Developer

December 2020 - CURRENT

- Built a responsive single page web application for a dog walking business using Javascript, React, CSS, Bootstrap, and EmailJS so customers can contact via the website
- Maintaining and updating the prices, photos, and company changes every week

PROJECTS

Weather API — makennamartin97.github.io/weather-api

- Built a weather API that displays the JSON data and a gif matching the current weather for the zip code entered
- Every type of weather listed in the API is associated with a different gif (volcanic ash, heavy rain, snow, tornado, etc)
- Tech Stack: Javascript, JQuery, CSS

Wedding Planner — github.com/makennamartin97/theweddingplanner.git

- A login/registration CRUD application that allows users to post weddings, RSVP, and see who else is attending
- Tech Stack: C#, ASP.Net Core, Bootstrap, and MySQL

Portfolio — makennamartin.dev

- Portfolio showcasing skills, daily Github contributions and multiple projects
- Responsively designed and deployed with Github Pages
- Tech Stack: Javascript, React, CSS, Bootstrap

SKILLS

Javascript (NodeJS, ReactJS, ExpressJS, ES6+)

Python (Django, Flask)

C# (ASP.Net Core, Entity)

MySQL, MongoDB

JQuery

HTML5/CSS/Bootstrap

Git + Github

Rest API

MVC Framework

Object Oriented Programming (OOP)

EDUCATION

Coding Dojo, Arlington VA — Software Development

April 2020 - August 2020

-Graduated with perfect-score black belts on all 3 full stack exams in Python/Django, C#/.Net, and MERN

-Accumulated 1,500+ hours of intensive programming coursework including building, testing, debugging, and deployment

Arizona State University — Software Engineering

August 2019 - December 2019
